JavaScript

Responsive Web Design

AREA OF EXPERTISE

Coding Expert

Proficient in HTML, CSS, JS, React

Problem Solver

Innovative approach to challenges

Team Player

Excellent collaboration skills

Visionary Developer

Crafting Tomorrow's Solutions Today.

SUMMARY

Dedicated to building dynamic web applications with React. Proven skills in crafting responsive interfaces and efficient code translation from design concepts. Successful independent project completion highlights problem-solving abilities and commitment to quality solutions. Stay abreast of industry trends for ongoing learning and improvement.

TRAINING & CERTIFICATION

FRONT-END Mastery

udemy

 2024

- Proficient in HTML for structuring content.
- Skilled in CSS for styling and layout.
- Competent in JavaScript for interactive web elements.
- Experience with React for building dynamic and efficient user interfaces.

PROJECTS

ShopSphere - Redefining E-Commerce Dynamics

Technologies: HTML, CSS, JavaScript, Stripe API

ShopSphere

Trend-Forward User Experience:

- Developed a sleek, responsive interface featuring dynamic navigation, product carousels, and interactive hover effects to captivate modern shoppers.

Effortless Payments, Seamless Shopping:

- Integrated Stripe's secure payment gateway, enabling frictionless transactions and real-time order updates for a hassle-free checkout experience.

Built for Growth & Innovation:

- Engineered for scalability with future-ready capabilities like advanced search filters, AI-powered personalized recommendations, and data-driven analytics to stay ahead in e-commerce trends.

InstaLite - A Modern Instagram Clone

Technologies: HTML, CSS, JavaScript

nstaLite

Dynamic User Experience:

- Crafted a responsive and engaging interface inspired by Instagram, featuring a navigation bar, real-time search, and seamless hover effects for smooth interactions.

Interactive Story Section:

- Implemented an interactive story carousel, dynamically adjusting for various screen sizes to maintain accessibility and visual appeal.

Dark Mode Integration:

- Enabled a toggle for dark mode, enhancing user comfort during extended browsing sessions, implemented using CSS variables and JavaScript.

Post Features:

- Designed a detailed post section, including image uploads, video playback, likes, comments, and share functionality, reflecting a social-first experience.

Responsive Design:

- Utilized media queries to ensure optimal layout and functionality across devices, from desktops to mobile screens.
